

Working remotely

Connect. Share. Create.
Wherever, whenever, with
a little help from Google.

May 2020

Working remotely comes with benefits and challenges. Goodbye, commute. Hello, distractions.

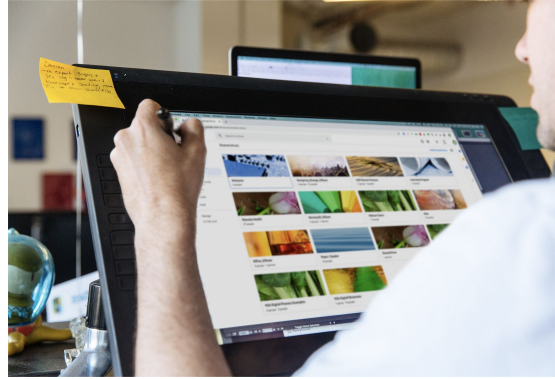

Whether you're new to it or looking for a new way to make it work for you, these **tips and how-to's can help you adjust to working remotely**—so you can succeed whenever you're not in the office.

Make working remotely work a little better by...

Staying connected

Conversation is a big part of office life. When working remotely, connecting face-to-face will help break up your day, and make you happier and more productive.

Sharing easily

Being able to share, store, and access files—without relying on email or hard drives—will simplify you and your team's workload, and help you avoid delays and mishaps.

Creating together

Modern collaboration solutions let you and your coworkers work on the same files at the same time without stepping on each other's toes.

Tip #1

Show your work or just a smile

When in-person isn't possible, video meetings are the next best thing. They let you present work, avoid long email threads, and engage in some much-needed socialization.

Regular video meetings can help you build a routine and keep regular business hours.

And scheduling time for coffee talks, group lunches, and happy hours, etc., will help you maintain relationships and culture outside the office.

Video meetings are also a good reason to create a designated workspace, if possible. One that:

Is quiet with a simple background.

Has a strong internet connection.

Provides a steady surface for your device.

Allows you to keep your camera on.

Tip #2

Always consult the calendar

Time can become a little abstract when working remotely, especially if you're new to it.

Keeping your calendar up to date and checking your coworkers' can help you create a plan (and stick to it)—and help you continue to practice good workplace etiquette.

We recommend:

Creating blocks on your calendar for work time, breaks, or whenever you know you'll be unavailable.

Consulting your coworkers' calendars before scheduling a meeting or asking for something that will take more than just a few minutes.

Tip #3

Switch on “work mode”

Getting dressed for the office. Listening to music on your way to work. Packing your lunch. All these things tell your brain one thing: it's business time.

Working remotely can disrupt some or all of these cues—which can lead to slower starts and feeling unproductive.

As you create your new routine, find a way to signal the start of your at-home workday.

Put on music while you get ready or have breakfast.

Take time in the morning to read your commute book.

Prepare a snack or meal for later.

Make a to-do list for the day.

Staying connected

What you'll need

General

Your **computer** or **phone**.

Headphones or a **quiet spot**.

A built-in or external **camera**.

Microsoft Outlook users

A supported version of Microsoft Outlook, Office 365, or Exchange.

A G Suite account with Meet turned on for your organization.

Google Meet add-in installed on your computer. On the Office toolbar, in the Add-ins section, click Store and follow the installation instructions.

If you're using a mobile device, download the **Google Meet app** in your app store.

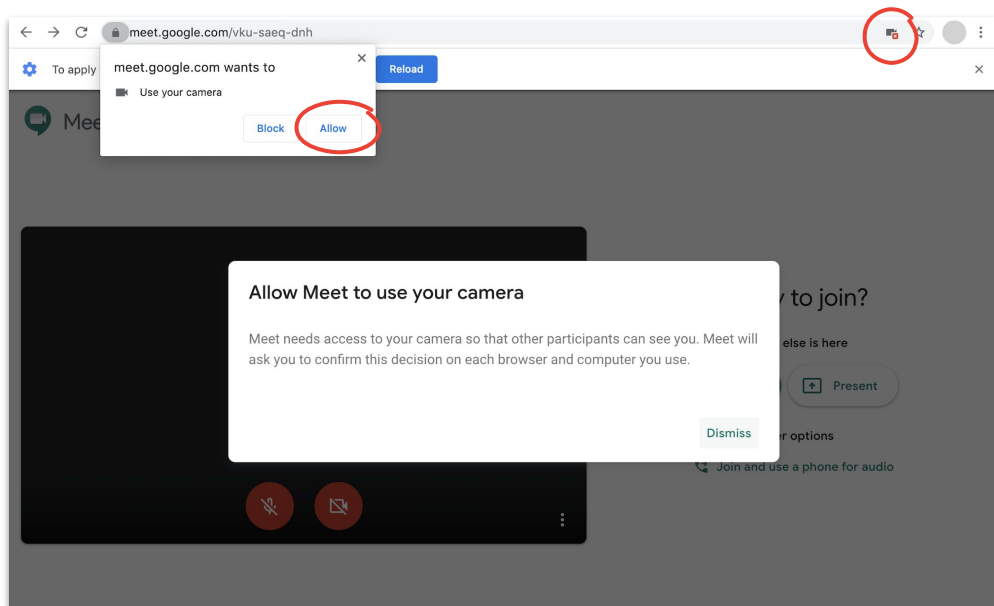

Staying connected

Camera and mic access

If it's your first time using Google Meet, click **Allow** when prompted while joining your event.

If you've previously blocked camera or mic access, join your event, then:

1. Near the top right, click  **Camera blocked**
2. Then click **Always allow meet.google.com to access your camera and microphone**
3. Click **Done**

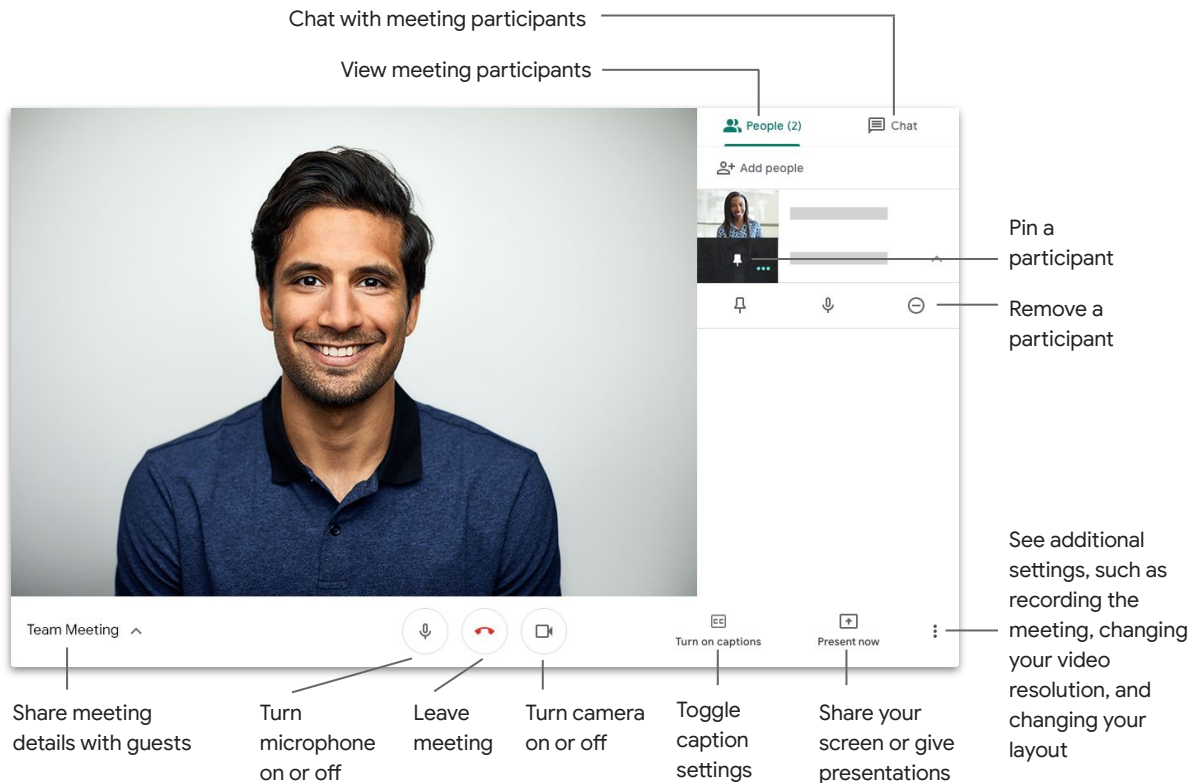

You can also turn your camera on and off, and mute your mic in a meeting using the [Meet interface](#) controls.

Staying connected

Meet interface

Google Meet's interface makes it easy to control your meeting experience.

Staying connected

Create a meeting Using Meet

If you're in a browser, you can quickly create a new meeting by visiting the [Meet homepage](#).

1. Go to the [Meet homepage](#)
2. Click **Join or start a meeting**
3. Click **Continue**
4. Click **Join now**

If you're on your phone, you can also create a meeting in the **Google Meet app**.

[Learn more at the Help Center.](#)

See what you can do with Google Meet

Staying connected

Create a meeting Using Microsoft Outlook

You can create a meeting from your Microsoft Outlook calendar or email—which is helpful when you want to check someone’s availability or have already agreed on a time via email.

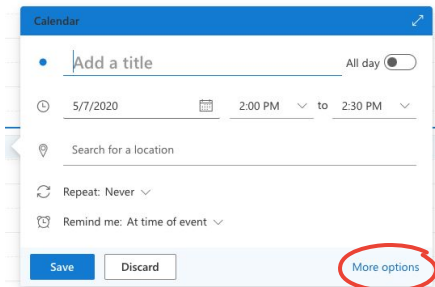

1. In your calendar, highlight where you want the meeting to occur
2. In the event window, click **More Options**
3. Then click **More** then **Google Meet** then **+ Add a meeting**

The joining information will then be added to your calendar or email invite.

You can also create a meeting from your email by clicking the **Meet icon**.

[Learn more at the Help Center.](#)

Staying connected

Join a meeting Using Meet

You can join a meeting while in your browser from the [Meet homepage](#).

1. Go to the [Meet homepage](#)
2. Select the meeting from your list events, or enter a meeting code or nickname
3. Click **Join now**

If you're on your phone or have a poor connection, use the **Google Meet app** to join a call.

[Learn more at the Help Center.](#)

The screenshot shows the Google Meet homepage. At the top, there is a navigation bar with 'Google Meet', 'Overview', 'How it works', and 'Plans & pricing'. On the right side of the navigation bar, there are links for 'Sign in', 'Join a meeting', and 'Start new meeting'. Below the navigation bar, there is a yellow banner with the text 'Learn about our solutions for [education](#) and [healthcare](#).' The main content area features the headline 'Premium video meetings. Now free for everyone.' followed by the sub-headline 'We re-engineered the service we built for secure business meetings, Google Meet, to make it free and available for all.' Below this, there is a red circle highlighting the 'Start new meeting' button, the word 'or', the 'Enter meeting code' input field, and the 'Join' button. To the right of the text is a grid of nine video thumbnails showing various people in a meeting. At the bottom of the page, there is a link 'Don't have an account? [Sign up for free](#)' and a section titled 'See what you can do with Google Meet' with a downward arrow.

Staying connected

Join a meeting

Using Microsoft Outlook

You can join a meeting from your Microsoft Outlook calendar or email by opening the calendar event or email invite and clicking the link.

1. Click the **event URL** in your email or calendar
2. The event will automatically open in your browser

Links are a great way to join meetings last minute. Just ask the event creator for the link and click.

[Learn more at the Help Center.](#)

Staying connected

Add people

Using Meet and Microsoft Outlook

If you forgot someone or have a last-minute guest, you can quickly add people using the [Meet interface](#) after a meeting has started.

Option 1

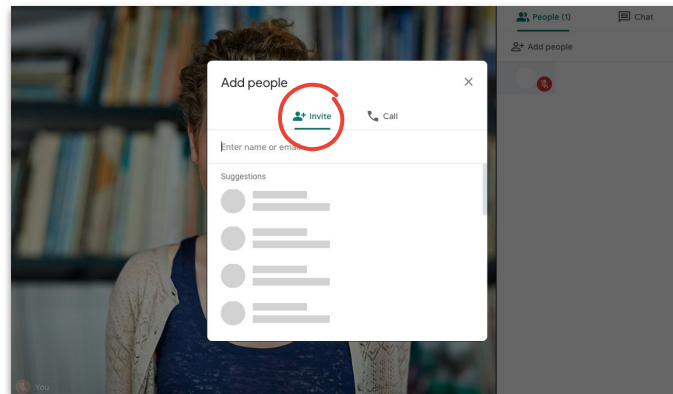

1. On the top right, click  > **People** then  **Add people**
2. Enter names or emails and click **Send invite**

Option 2

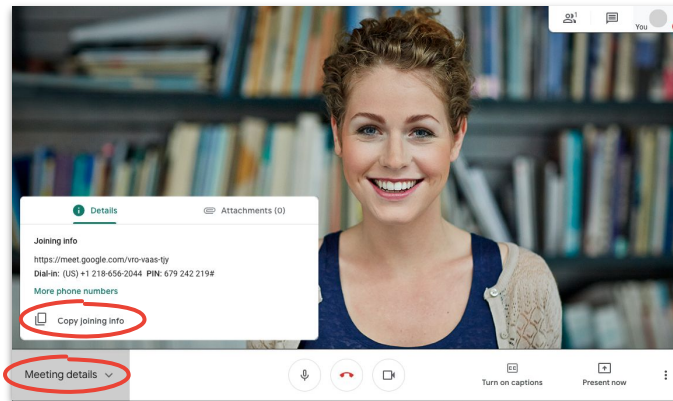

1. In the bottom left, click the meeting name
2. Click  **Copy joining info**
3. Message the meeting details to the new guests

[Learn more at the Help Center.](#)

Option 1:

Option 2:

Add people Using guest's phone

If your guest has a poor connection or is joining on the go, you can help them easily join via their phone.

1. Join the meeting, go to the top right and click  > **People** then  **Add People**
2. Click  **Call**
3. Select the country you're calling to add the country code
4. Enter the person's phone number, then click **Call** and wait for them to answer

This option is only available in certain countries. Make sure the number you're calling is from a [supported country](#).

[Learn more at the Help Center.](#)

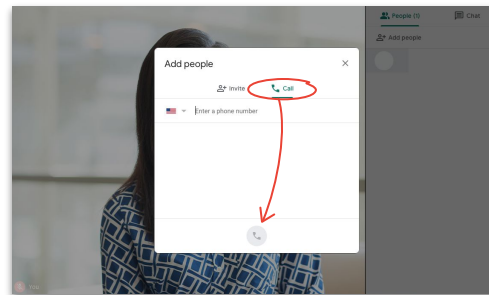

Step 1:

Step 2:

Steps 3 & 4:

Staying connected

Present your screen While conferencing

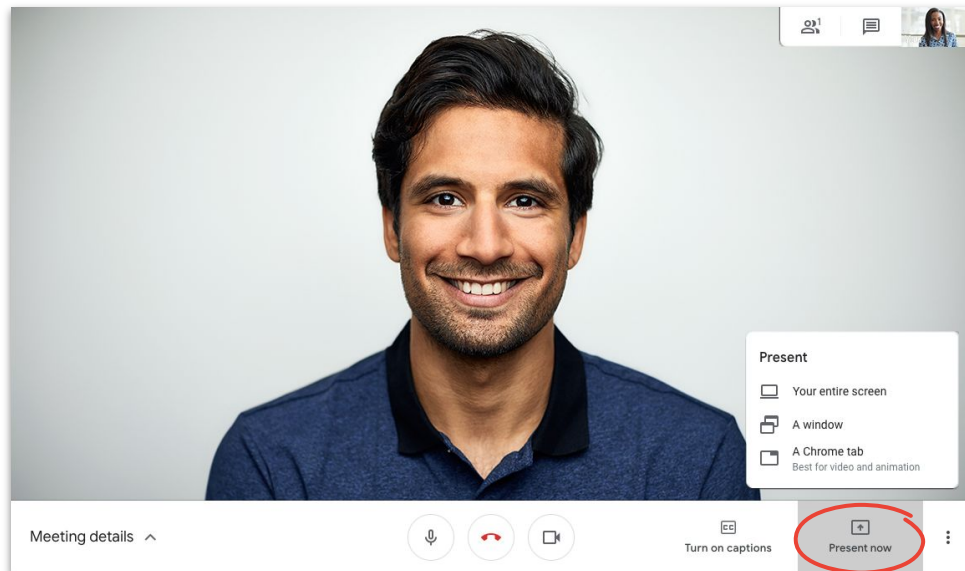

Whether it's for a formal presentation or something spur of the moment, you can easily share your screen once you're in a meeting.

1. In the bottom right, select **Present now**
2. Choose **Your entire screen**, **A window**, or **A Chrome tab**, then select the content you'd like to share
3. Click **Share** to begin

If you need to show higher-quality video and audio, choose **Present a Chrome tab**.

[Learn more at the Help Center.](#)

Staying connected

Present your screen

Joining only to present

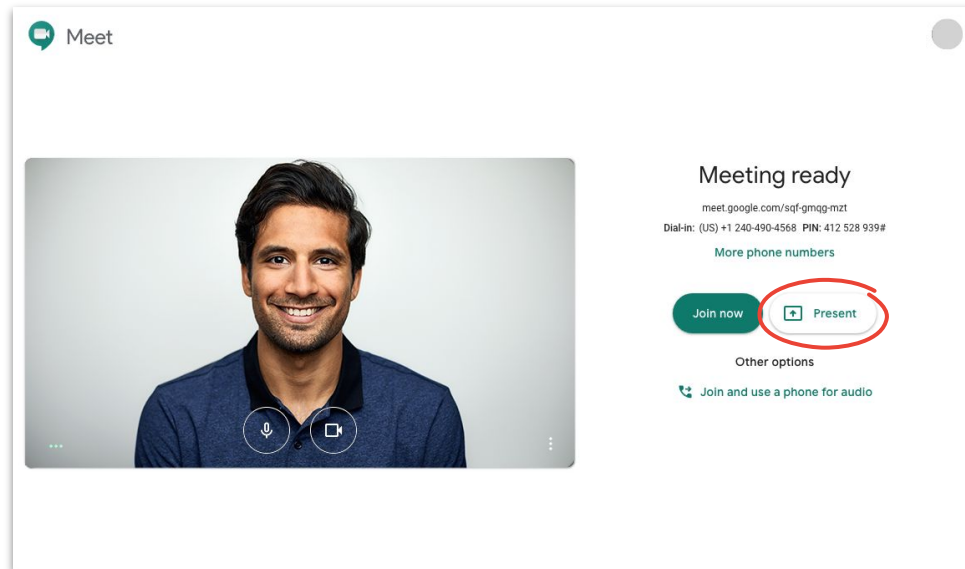

You can also be the “person behind the curtain” by joining only to present. This is helpful for live streams or using one presentation for multiple presenters.

1. Go to the [Meet homepage](#)
2. Select the event or click **Join or start a meeting** and enter the meeting code
3. Click **Present** (instead of Join now)
4. Choose a window or app and select **Share**

No audio or video will be shared—just the window or app you present.

[Learn more at the Help Center.](#)

Staying connected

Layouts

Different layouts help you do different things.

Spotlight keeps you focused on one thing, while **Tiled** makes it easier to have conversations with more than a few people.

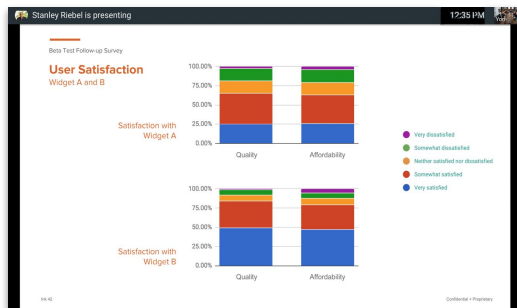

Change your layout by clicking  **More** then  **Change layout** and selecting:

- **Auto:** Meet chooses for you (default setting)
- **Sidebar:** one large frame with additional frames on the side
- **Spotlight:** one large frame with the speaker, a presentation, or a pinned feed
- **Tiled:** up to 16 people in a grid

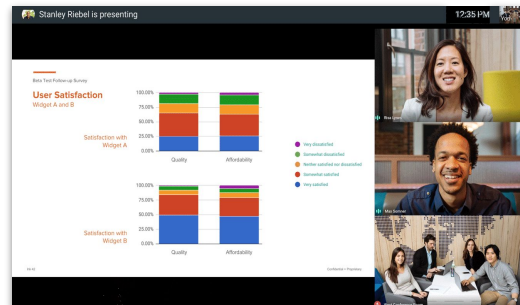

[Learn more at the Help Center.](#)

Select a layout

Spotlight

Sidebar

Tiled

Staying connected

Captions

Live captions help ensure everyone can use Meet. Whether you use them for accessibility reasons or because of bad audio, you won't miss a word when captions are on.

1. At the bottom of the Meet window, click  **Turn on captions**
2. Click  **Turn off captions** to stop using

If you don't see the options above, you may have to click  **More** first.

Currently available only in English.

Captions will not appear in recorded meetings.

[Learn more at the Help Center.](#)

Staying connected

Use phone for audio After joining a meeting

If you have a poor connection or experience bad audio while in a meeting, you can use your phone to speak and listen by having Google Meet call you.

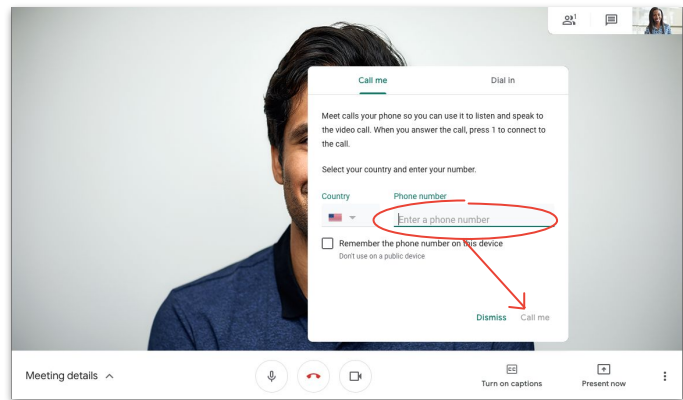

1. Click **More** then **Use a phone for audio**
2. Click **Call me**
3. Enter your phone number
4. Click **Call me**
5. When prompted, press **1** on your phone

Only available for U.S. and Canadian phone numbers.

You can still use your computer for video and presenting.

[Learn more at the Help Center.](#)

Staying connected

Use phone for audio Before joining a meeting

You can also join a meeting at the start using your phone for audio, if you know your connection may be poor.

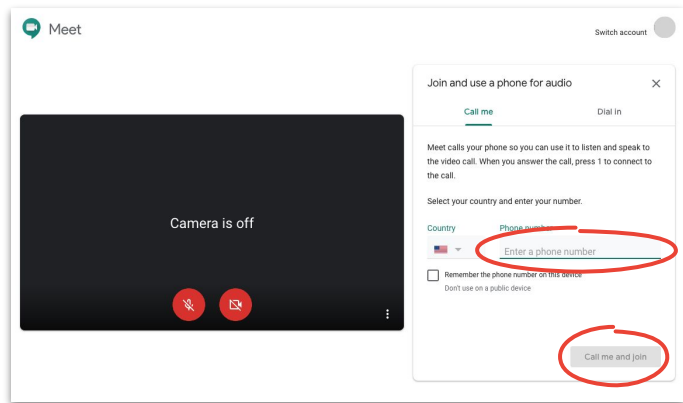

1. From the [Meet homepage](#), select **Join and use phone for audio**
2. Click **Call me**
3. Enter your phone number
4. Click **Call me**
5. When prompted, press **1** on your phone

Only available for U.S. and Canadian phone numbers.

You can still use your computer for video and presenting.

[Learn more at the Help Center.](#)

Staying connected

Use phone for audio When dialing in

If you're using a conference phone for audio, you'll need to dial in manually.

1. Depending on whether you're already in a meeting, click **More** then **Use a phone for audio** or select **Join and use phone for audio** on the [Meet homepage](#)
2. Click **Dial in**
3. Select your country
4. Dial the number
5. When prompted, enter the PIN and then #

Only available in [supported countries](#).

You can still use your computer for video and presenting.

[Learn more at the Help Center.](#)

Record meetings

Recording meetings saves you from taking notes and makes it easier to share information with others.

1. While in a meeting, click **More** then **Record meeting** to start recording
2. Click **More** then **Stop recording** when you're finished
3. Wait for the recording file to be generated and saved to the meeting organizer's **My Drive > Meet Recordings folder**
4. An email with the recording link will be sent to the meeting organizer and the person who started the recording

[Learn more at the Help Center.](#)

Staying connected

Live stream For full participants

Live streaming lets you connect with larger audiences. You can invite up to 250 full participants—who can stop, start, and record the event.

1. In your calendar, click **+** **Create** then **More options**
2. Add the event details and full-participant guests
3. Select **Add Google Meet video conferencing** then **Google Meet**
4. Click the **∨** **Down arrow** and select **Add live stream**
5. Click **Save**
6. During the meeting, click **⋮** **More** then **Start streaming** to begin event

Only guests within your organization can view a live stream from your organization.

[Learn more at the Help Center.](#)

The screenshot shows the 'Add live stream' configuration interface in Google Calendar. The event is titled '[Presenters] Q2 Company all hands' and is scheduled for May 27, 2020, from 11:00am to 12:00pm. The interface includes sections for 'Event Details', 'Join with Google Meet' (with meeting ID and phone numbers), 'Live stream' (with stream URL and invitation text), 'Remove live stream', 'Notification' (set to 10 minutes), 'Add notification', 'Guests' (listing organizer cfurr@ink-42.com and guests Julie Wen and Nick Owen), 'Rooms', and 'Guest permissions' (with checkboxes for 'Modify event', 'Invite others', and 'See guest list'). A text box at the bottom contains the message: 'Presenters please plan on joining at least 5 minutes before the call starts. A separate invite has been sent to viewers.'

Staying connected

Live stream

For view-only participants

If you're setting up a companywide meeting and will have more than 250 guests, you can add up to 100,000 guests as view only.

They'll be able to view the event live, but they can't stop, pause, or record it.

1. In your calendar, single-click the live stream event you created for [Full participants](#)
2. At the top, click **More actions** then **Create view-only event**
3. Add guests or rooms
4. Click **Save** then click **Send**

Only guests within your organization can view a live stream from your organization.

Going? Yes No Maybe ^

Staying connected

Low-light mode

Meet now uses AI to automatically adjust your video to [make yourself more visible](#) to other participants when your lighting is bad.

Currently only available in the **Google Meet app**, but will be extended to web experience in the future.

Staying connected

Noise cancellation

To help limit interruptions (for you) and distraction (for others), Meet now **intelligently filters out background noises**, like dog barks or keyboard typing.

Currently only available in the web experience, but will be extended to the **Google Meet app** in the future.

Sharing easily

Safely store, access, and share your files with Google Drive.

What's ahead

[Tips 32–34](#)

[Set up a shared drive 35](#)

[Install Drive File Stream 36](#)

[Upload content 37–38](#)

[Invite collaborators 39–40](#)

Tip #1

Reestablish your process

As you and your team adjust to working remotely, take time to evaluate your collaboration process. What worked in the office might not work outside it, and figuring that out sooner rather than later will ensure a smoother transition.

If you haven't already, consider:

A file sharing solution that lets you create, track, share, and collaborate on files in one place more easily.

Scheduling time to make sure everyone knows how to use any new solutions you adopt properly, and follows the same procedures when using them.

Tip #2

Share at the right time

Workdays are filled with ebbs and flows. Knowing when you and your teammates are most productive will help you plan your day. And it can be an unofficial strategy for when you share work, ask questions, or assign tasks.

If a coworker has kids at home, for instance, learn what works best for their schedule and get in the habit of sharing work when you know they'll be back at their computer.

Whenever you're working closely with someone in a different location, take a moment to:

Ask about their current workload and upcoming time off.

Find out if they have any regular conflicts or times when they'll be unavailable.

Share info about your own workload, time off, and availability.

Tip #3

Go the extra mile on security

For most people, working remotely means more emails and trying out new tools, and that can open you up to new security risks.

Take some time to brush up on your cybersecurity knowledge. (A refresher never hurts!) And see if you're using all the safety measures you have at your disposal.

Here are some things to consider:

Turn on 2-Step Verification, if available, to help protect your account.

See if your file sharing solution has additional security features when working with sensitive information.

Always check permissions to make sure the right people have the right level of access.

Set up a shared drive

Teams can easily store, search, and access files on shared drives, which makes them great for when a group needs access to the same files or to store company wide documents.

Shared drives also offer extra security options to help protect sensitive files.

1. Visit **Drive**
2. On the left, click **Shared drives**
3. At top, click **New**
4. Enter a name and click **Create**
5. At the top, under the shared drive name, click **Add members**
6. Enter their names and click **Send**

 Files in a shared drive belong to the team, not the individuals who created them. If a team member leaves, the files they created stay.

[Learn more at the Help Center.](#)

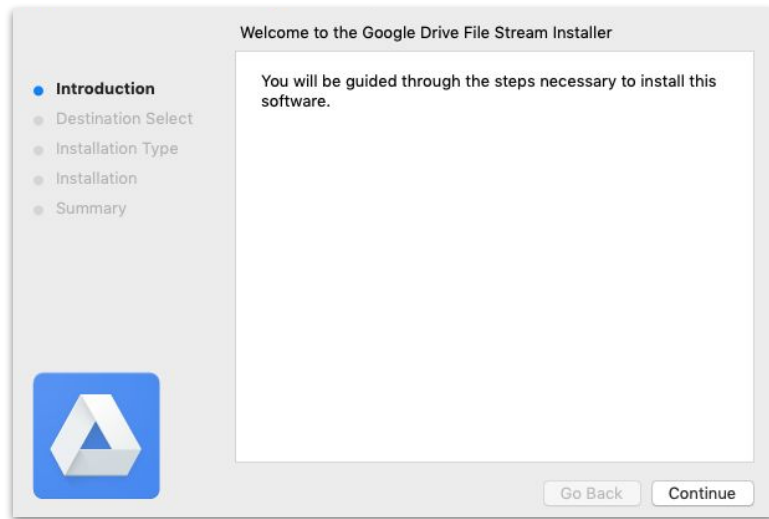

Install Drive File Stream

If you prefer to work with files directly on your desktop rather than in a browser, try Drive File Stream (a.k.a. Drive for Desktop) to access Drive files using your Mac or PC's file structure.

You'll still be connected to the cloud, so any changes will be saved automatically and everyone will have access to the latest version.

1. Download [DriveFileStream.exe](#) for Windows or [DriveFileStream.dmg](#) for Mac
2. Follow the on-screen instructions

[Learn more at the Help Center.](#)

Sharing easily

Upload content To My Drive

Uploading content is easy, and you can do it using your browser, mobile device, or desktop.

Just remember, My Drive is like your hard drive. No one can access files in your My Drive unless you give them permission. So use it for files you want to own and control as an individual.

1. Go to [My Drive](#)
2. Drag files or folders right into Drive to upload, or click **+ New** to manually select them from your hard drive
3. Click **Open**

[Learn more at the Help Center.](#)

Sharing easily

Upload content To shared drives

With shared drives, your team will have immediate access to any files you upload—which saves you from having to grant access to large project teams.

You can change the level of access for individuals, selecting either **Edit** (default), **Comment**, or **View**.

1. [Create a shared drive](#) or click  **Shared drives** and select the drive you want to add to your hard drive
2. Click  **New** to select the file or folder from your hard drive
3. Click **Open**

 If you're using the latest version of Chrome or Firefox, you can drag and drop your uploads.

[Learn more at the Help Center.](#)

Invite collaborators To My Drive

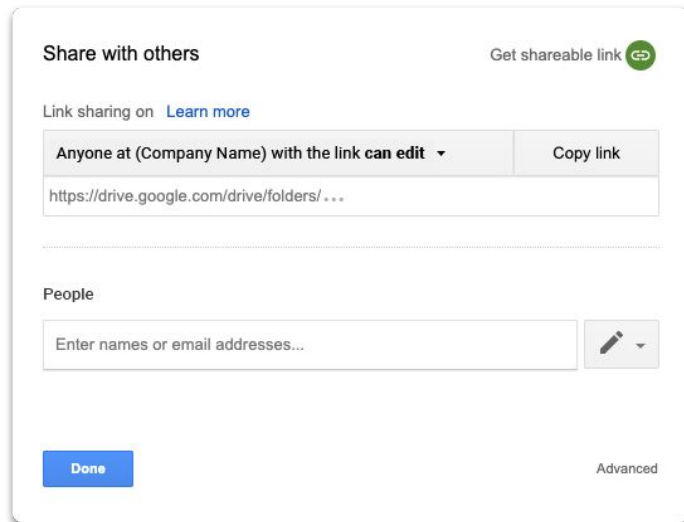

If you want to work with others on files in your My Drive, you'll have to grant each person access. While it is an extra step (compared with using a shared drive), it gives the file owner more control over access.

1. In [My Drive](#), right-click the file or folder and select  **Share**  if you're in the file, click  **Share** near the top right
2. Under **People**, enter the names or emails you want to add
3. Click the  **Edit** dropdown to choose the level of access
4. Add a note to the email notification if you want, or uncheck the **Notify people** box to skip the notification
5. Click **Send** or **OK** if you skipped the notification

When inviting someone, remember to give them the right level of access.

[Learn more at the Help Center.](#)

Invite collaborators To shared drives

Files you put in a shared drive are automatically shared with drive members, and they can share those files unless you restrict their access. This is helpful when uploading multiple files to which the same group of people needs access.

You can share files in a shared drive with new people at any time.

1. Go to the shared drive, right-click the file, and select **Share**, OR if in a file, click  **Share** near the top-right
2. Add the names or emails you want to share with
3. Click **▼ Edit** to choose the level of access
4. If you want, add a message to the email notification, or check the **Skip sending notification** box to not send a notification
5. Click **Send** if sending a notification or **Add** if skipping the notification

[Learn more at the Help Center.](#)

Creating together

Collaborate in real time from anywhere using Docs, Sheets, Slides, Forms, and Sites.

What's ahead

[Tips 42–44](#)

[Create a new file 45](#)

[Use comments 46–51](#)

[Manage notifications 52](#)

[Access version history 53](#)

[Suggest edits 54](#)

[Use Microsoft Office files 55–59](#)

[Share files with Google Sites 60](#)

Tip #1

Work like you're in the same room

Modern collaboration solutions let you and your team work together from anywhere. They make it easier to have specific and targeted conversations, provide a complete record of when and how a file changes, streamline workloads, and connect with coworkers.

Collaborating in real time saves you from:

Emailing back and forth with thoughts or edits.

Searching for (or forgetting) attachments.

Version control issues and manually merging files.

Losing unsaved changes.

Tip #2

Collaborate on non-work work

Whatever you do in your spare time, there's a good chance you work with someone who's into the same thing.

Shared files are a great way to extend conversations you've had during video meetings, in emails, or using chat. And they can help you exchange information, set goals, or share opinions on an ongoing basis (on things other than work).

Here are some things to consider:

Into baking? Share your favorite recipes.

Perfecting your fitness routine? List your go-to moves.

Into home improvement? Track your progress or share tips.

Tip #3

Create a reward system

When you're working remotely, rewarding yourself for a job well done is a great way to motivate yourself and break up your day.

A short walk, a special snack, or a little TV break can be the encouragement you need to sit down and focus on the task at hand.

We recommend:

Writing down goals or tasks, and what your reward will be for completing them.

Being honest; only claim your reward once your goal is met.

Create a new file

You can start collaborating in seconds with Docs, Sheets, Slides, Forms, and Sites. Which you choose just depends on what you're doing. Tracking lots of data? Try Sheets. Need to build a killer presentation? Go with Slides.

1. In **Drive**, click  **New**, then select the file type and either **Blank document** or **From a template**
2. In the top-left corner of the new file, click **Untitled document** to enter a file name
3. Begin working

[Using templates](#) helps save time when creating new files. Docs, Sheets, Slides, and Forms all include many options.

[Learn more at the Help Center.](#)

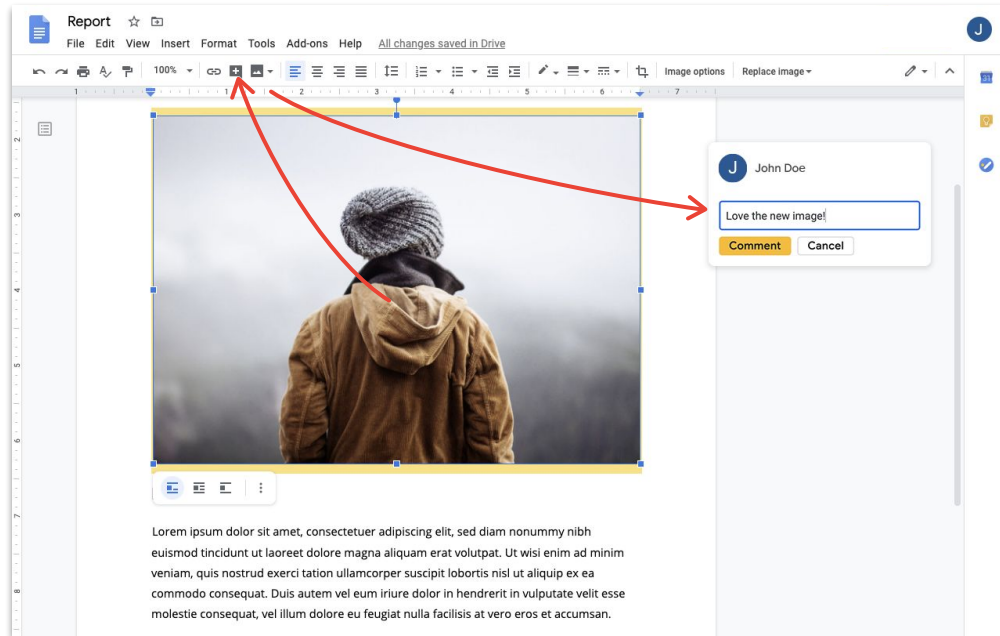

Blank

Add a comment

Commenting lets you have a real-time dialogue in your files, with all the necessary context.

1. Open the file and select the content you want to comment on
2. Click **+** **Add comment** in the menu
3. Enter your comment in the box
4. Click **Comment**

[Learn more at the Help Center.](#)

Reply to a comment

Comments aren't a one-way conversation. They're a chance for you to share your opinion, suggest an alternative, or even just show you're in agreement. Whatever you want to say, it's easy to say it.

1. Click the comment you want to reply to
2. Click **Reply** and type your message
3. Click **Reply** to save

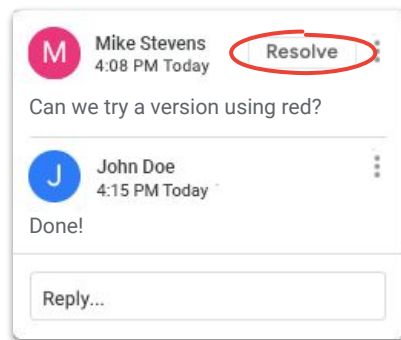

[Learn more at the Help Center.](#)

Resolve a comment

Once the conversation is over, don't forget to resolve open comments so everyone knows they're closed.

1. Click on the comment you want to resolve
2. If responding before resolving, click **Reply** and type your message
3. Then in the top corner of the comment box, click **Resolve**

[Learn more at the Help Center.](#)

Assign an action item

Assigning action items is a good way to divide and conquer tasks (and keep track of who's doing what), or to make clear who needs to weigh in when there are many people working in a file together.

1. When writing a comment, enter an at symbol (@) followed by the person's email address
2. Check the **Assign to** box that appears once you've added the person's email to your comment
3. Finish your message
4. Click **Assign**

[Learn more at the Help Center.](#)

View comment history

Resolving a comment doesn't erase it forever. You can go to a file's comment history to see all open and resolved comments in one place. It's like a little record of how a file evolved. (Because you never know when you may need to refresh your memory.)

1. Near the top right, click  **Open comment history**
2. Scroll to review the comment history and reply, resolve, or re-open comments

[Learn more at the Help Center.](#)

Re-open a comment

If you want to continue a conversation or revisit an idea that's been resolved, you can re-open closed comments in the comment history.

1. Near the top right, click  **Open comment history**
2. Scroll to review the comment history
3. Find the comment you want to re-open and select  **Re-open** then **Re-open OR** add your reply then click **Reply** and the comment will re-open automatically

The re-opened comment will now appear again in the margin to the right.

Click **Link to this comment...** for a link you can copy and share so others can jump right to the comment you're talking about.

[Learn more at the Help Center.](#)

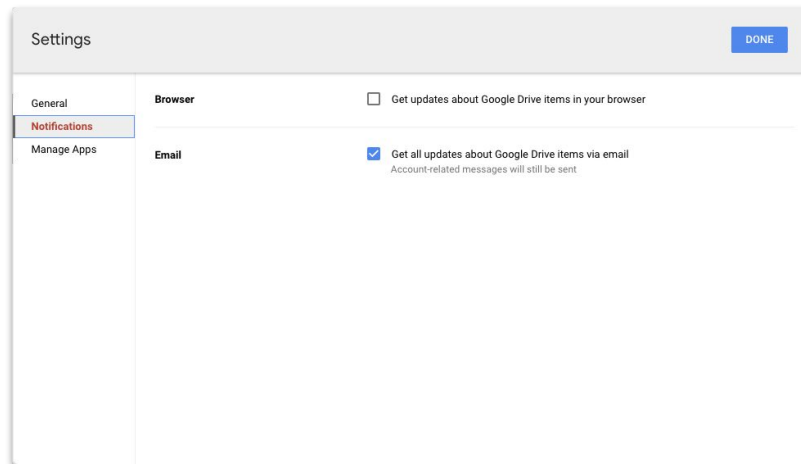

The screenshot shows a comment interface. At the top right, there are icons for 'Notifications' and 'Comment'. Below these, a comment by 'Diane Young' is shown, dated '10:58 AM Today'. The comment text is 'SELECTED TEXT: Check out the options on this page These are great, thanks!'. A 'Reply' button is visible. Below the main comment, there is a reply by 'Mary Ivory' with the status 'Marked as resolved' and the time '10:58 AM Today'. At the bottom, there is a text box containing the message 'Adding a comment will re-open this discussion...'. The 'Re-open' button next to the main comment is circled in red.

Manage notifications

Notifications help you stay on top of what's going on with your files. You can get notified when someone shares a new file or folder with you, you're mentioned in a comment, or someone requests access to a file you own.

1. In My Drive, click  **Settings** then select **Settings**
2. Click **Notifications** on the left
3. Check or uncheck the box next to the setting you want to change
4. Click **Done**

[Learn more at the Help Center.](#)

Access version history

Version history keeps all your drafts in the same file, so you can easily find cut content that needs to come back, or track when and why something changed.

1. In the menu, click **File**, then select **Version history**, then **See version history**
2. Click a timestamp to see a previous version; below the timestamp you'll see:
 - a. Who edited the file
 - b. A color next to each name, and the edits they made outlined in that color
3. You can then revert to an earlier version by clicking **Restore this version** OR return to the current version by clicking ←

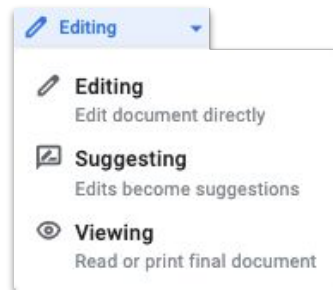

[Learn about avoiding version conflicts.](#)

Suggest edits

Sometimes proposing edits—without actually making the changes—is necessary. Like when reviewing legal documents where changes need to be approved, or when clients require a more formal process.

Suggesting edits is an easy-to-follow way of letting contributors review, approve, or reject changes.

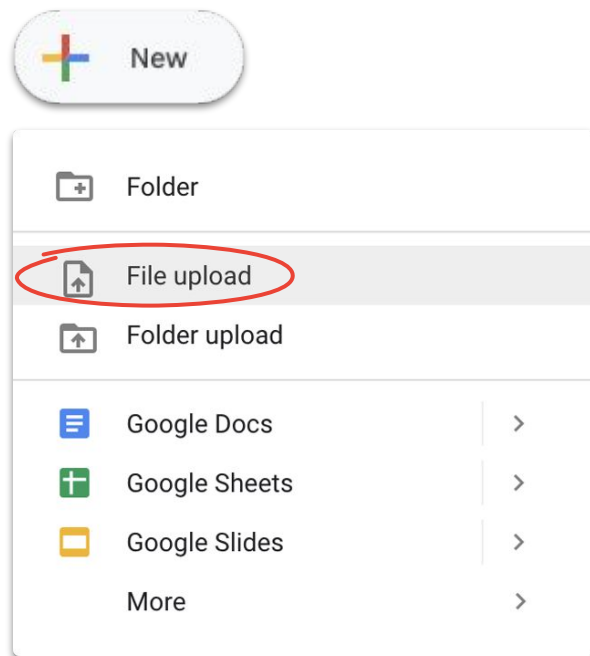

1. Near the top-right corner of a **Doc**, click  - **Editing** and choose  **Suggesting**
2. Begin typing your edit; your suggestion will appear in a new color, and the text you're changing will be crossed out but not actually deleted

Add Microsoft Office files to Drive

If you use Microsoft Office files, no problem—just upload them to Drive and start working together, with the benefits of modern collaboration. No converting, resaving, or downloading necessary.

1. Open [Drive](#)
2. Click **New**, then **File upload**
3. Choose the Office file you want to upload
4. Select **Open**

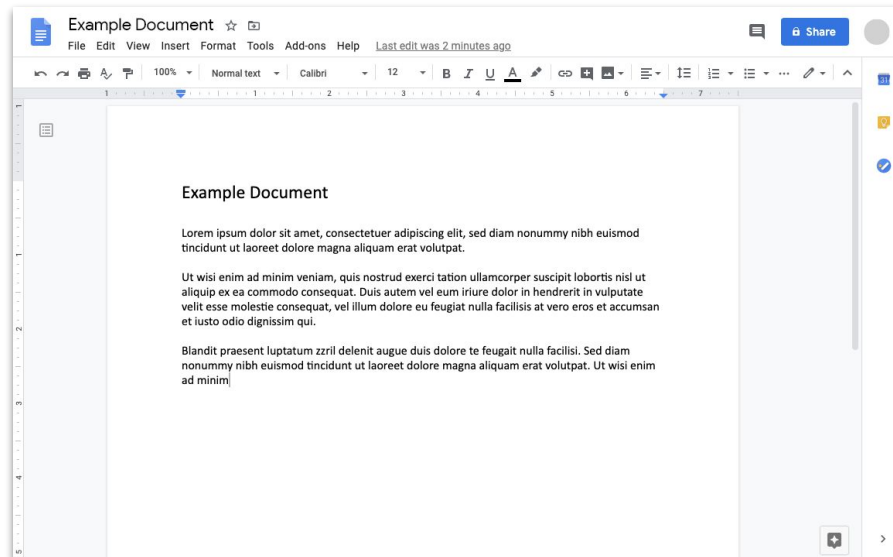

Work on Microsoft Office files in Drive

You can open and work on Microsoft Office files in Drive, make edits, and then save those changes to the original file without creating a new file or reuploading.

1. In [Drive](#), double-click the Office file to open a preview
2. At the top, click **Open in Docs**, Sheets, or Slides; if you don't see this, click **Open with** then Docs, Sheets, or Slides
3. You can now edit, share, view version history, and collaborate in real time with others
4. Close the window when you're done, and your edits will be saved to the original Office file

If you view but don't edit an Office file in Google Docs, Sheets, or Slides, the original Office file will not change.

Convert Microsoft Office files to Google files

If you don't need Microsoft Office versions of files going forward or want to simplify collaboration by using Docs, Sheets, and Slides, you can convert your Office files to Google files.

1. In [Drive](#), double-click the Office file to open a preview
2. At the top, click **Open in Docs**, Sheets, or Slides; if you don't see this, click **Open with** then Docs, Sheets, or Slides
3. Click **File** then **Save as Google Docs**, Sheets, or Slides

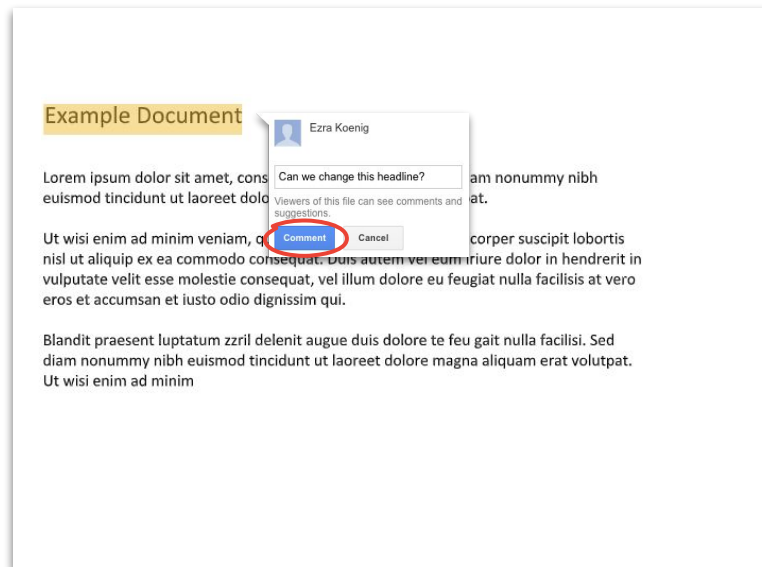

You can always switch back by downloading a Google file as an Office file.

Comment on Microsoft Office files in Google Drive preview

Similar to Google files, you can use comments to have conversations and share thoughts (with the right context) in Microsoft Office files. Using Google Drive preview makes it easy and avoids any extra steps, like resending or reuploading.

1. Open [Drive](#) and double-click an Office file
2. Select the text, cell, or section you want to comment on
3. Click **+ Add comment**
4. Enter your comment (to address it to a specific person, enter @ and their email in the comment text)
5. Click **Comment**

Track editing in a Microsoft Office file in Drive

If using [Drive File Stream](#), you can still work with others in real time. You just might have to take turns editing or refresh your file before you start.

1. In **Drive File Stream**, open a shared Office file; the real-time status appears at the bottom right
2. You will see:
 - a. **Safe to edit** (no one else is editing)
 - b. **Wait to edit** (someone else is editing); check **Notify me when it's safe to edit** to find out when you can start
 - c. **New version created** (someone created a new version); to get it, click **Get latest**
3. You can now edit, share, view version history, collaborate in real time with others, and more; all changes will be saved to the original Office file

Share files with Google Sites

Embedding files in a website with Google Sites is an easy way to share information with large audiences. Especially if you're sharing sets of documents that need context and to be organized in a specific way.

1. On the [Sites homepage](#), click  **Create** OR from [Drive](#), click  **New** then **More** then  **Google Sites**
2. Once in Sites, you'll need to:
 - a. Name your site
 - b. Select a layout and design options
 - c. Set up site navigation
3. Click **Publish** in the top right when ready to share

If you anticipate high traffic to your site, [publish your file](#) first, then embed the published URL into Google Sites.
