

Google Cloud NetApp Volumes

A fully managed, high-performance file storage service for demanding enterprise applications and workloads

What do you get when you combine the power of Google Cloud's availability, security, and innovation with NetApp's industry-leading storage management technology and award-winning NetApp® ONTAP® data management software? Introducing Google Cloud NetApp Volumes, a fully managed file storage service that simplifies how you migrate and run your most demanding enterprise workloads in the cloud—faster, smarter, and at less cost than ever before.

Seamlessly lift and optimize demanding Windows applications and enterprise-NFS workloads without refactoring

Get local, capacity optimized protection with instant NetApp Snapshot™ copies, volume clones, and the ability to instantly change performance tiers

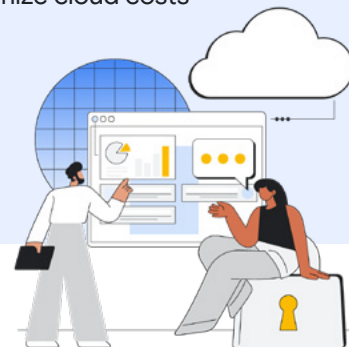

Get secure enterprise-grade storage with multiprotocol file support for file sharing, business applications, and disaster recovery

Maintain business continuity with intelligent data protection including scheduled Snapshot copies, instant volume cloning, and multiregion data replication

Cloud agility united with high-performance data storage

- Simplify Windows and Linux file storage
- Protect enterprise application data on Google Cloud
- Scale storage independently of compute and optimize storage for Google Cloud VMware Engine workloads
- Support remote workers
- Eliminate overprovisioning and optimize cloud costs

Flexibility matters

When it comes to running enterprise applications in the cloud, you need the power and flexibility to run either Windows or Linux applications as virtual machines on Google Compute Engine and Google Cloud VMware Engine. Enable your teams to migrate applications as is without needing to refactor, while also unlocking new opportunities with modern cloud-native architectures. Scale volumes from 100GiB to 100TiB and share data between traditional and containerized applications to leverage your data without waste.

Manage performance and storage spending on demand

Service level	MiB throughput/TiB	Workload types
Premium	64MiB/s	File shares, VMs, databases
Extreme	128MiB/s	OLTP high-performance databases, low-latency applications

Build cyber resilience

Cyber resilience and cybersecurity are crucial to eliminating downtime and providing business continuity. We've got you covered with robust, cost-efficient protective features and high reliability.

- Schedule point-in-time versions of your data to enable fast user-initiated file restores and protect against ransomware attacks
- Deploy highly available volumes and protect them with multiregion volume replication
- Improve compliance, privacy, and security with multiple layers of encryption, including customer-managed encryption keys

Simplify your cloud journey with Google Cloud NetApp Volumes

Google Cloud NetApp Volumes makes it easier, safer, and more cost efficient to migrate and run your enterprise applications and workloads in Google Cloud.

About Google Cloud

Google Cloud accelerates every organization's ability to digitally transform its business and industry. We deliver enterprise-grade solutions that leverage Google's cutting-edge technology, and tools that help developers build more sustainably. Customers in more than 200 countries and territories turn to Google Cloud as their trusted partner to enable growth and solve their most critical business problems.

About NetApp

NetApp provides systems, software, and cloud services that enable organizations to run their applications optimally from data center to cloud, whether they are developing in the cloud, moving to the cloud, or creating their own cloud-like experiences on premises. With solutions that perform across diverse environments, NetApp helps organizations build their own data fabric and securely deliver the right data, services, and applications to the right people—anytime, anywhere.
